1	This is a novel situation that humanity has not encountered before. It requires novel approaches and our tendency is to only move incrementally in terms of change. Also, the motivation to change when collectively there is no extreme discomfort simply isn't there - collectively we're not willing to live with less in order to extend humanities survival as a species.	3/25/2021 7:01 AM
2	We are resilient but we rely on our river for water and farming	3/19/2021 9:40 PM
3	Only if the government and local government start to actually listen, the barrier will be them. Start listening to local iwi about climate change affecting our areas, start working together to stop the impact being so harsh for all, actually start listening!	2/18/2021 2:11 PM

1	Electric cars - massive environmental damage in the production of batteries, hugely high cost for batteries and no safe way to dispose of them - was someone hoping there would magically be an answer and are proceeding on that basis - we've done that before and failed over and over. We should not be proceeding with change until that change is guaranteed to cause a great deal less harm.	3/25/2021 7:01 AM

## Q22 Is there anything else you would like to share about the Climate Change Commission's draft advice for reducing emissions?

Answered: 1 Skipped: 3

#	RESPONSES	DATE
1	I think it's ignoring the elephant in the room - the mass overconsumption of non-essential-to-survival items by the 1st world and the consumption driven economy of more, bigger, better. This is a basic flaw to how we live and until we are willing to give up conveniences and a multitude of luxuries, all this is just playing around the edges.	3/25/2021 7:01 AM
