Q22 Is there anything else you would like to share about the Climate Change Commission's zero emissions plan for Aotearoa, NZ?

Answered: 4 Skipped: 0

#	RESPONSES	DATE
1	The economy itself has to transform. It's highly extractive nature, that externalizes the cost of production onto the environment and society, and is full of contradictions of capitalism that undermine well-intended climate mitigation and adaptation efforts, is preventing humanity from taking the boldest climate action possible, and therefore dooming us to catastrophe.	3/28/2021 11:22 PM
2	More attention to how local communities can be enabled (rather than constrained) to enact kaitiakitanga, and how we can instill a sense of stewardship and working with and for local communities across the country.	3/27/2021 9:31 PM
3	The major contributors are Industrial Agriculture and predominantly not caused by Māori but felt by Māori. So extra support should be given to those most impacted and least responsible.	3/25/2021 11:06 PM
4	No.	3/18/2021 9:33 PM
