

Kia ora, my name is _____.

In 15 years from now, I will be _____ years old.

I am concerned about the future of our world, our common home in which we share life with all things. I know we can do more for our global neighbours and future generations by taking ambitious action at home in Aotearoa.

I hope in 15 years time, Aotearoa NZ will look like (draw a picture below):

A large, empty rectangular box with a black border, intended for a child to draw their vision of Aotearoa NZ in 15 years.

Please consider kids like me and, our future when you finalise your report!

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

Thank you for all the work that has gone into this draft advice from the commission. It is vital that what we work together to achieve for positive climate action makes a significant impact for future generations. I support more ambitious action; us doing more, sooner. We have contributed more proportionally to climate degradation from our emissions so it's only fair that we do more to reduce them.

Please ensure that all New Zealand's commitments are consistent with doing our part to keep global warming within 1.5 degrees.

I know that this will be costly action. We will all have to make sacrifices and I intend to do my part. I support bold action but it is also important that we are just in the implementation of change so that those who can afford it carry the burden of cost rather than those who cannot are supported to do what they can.

Thank you,

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

2.1. don't underestimate the climate effect of pavement. Trees absorb light. Transac reflects it. And tarmac is a byproduct of petroleum.

Write your submission here. It will be more powerful in your own words.

1, Ready-crete is a product used in building. The manufacture of this product requires a large amount of gas. It is unnecessary. The product should be phased-out and replaced with "builders mix" and cement. For a small amount of inconvenience a huge amount of fossil fuels can be saved or not used.

2, The resource management act should be used on individual motor vehicles. They can be either consented to operate or not.

3, Good on the climate Commission

For new buildings electricity on hobs instead of gas.

Homes need to be built nearer peoples place of work - to save on travelling costs. - more density housing. allowing for some combined park and play areas.

Update home fines for illegal burning.
Insulation to be improved on houses.
Solar heating where applicable.

I am concerned about sea level rising especially our island nations who are vulnerable.

- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

- I SUPPORT RENEWABLE ENERGY.
- I WISH FOR SYNTHETICS TO BE REPLACED BY WOOL - CARPETS ETC - MORE NATURAL FIBRES.
- COMPOSTING.
- REDUCING AIR POLLUTION - SOLAR, INSULATION.
- PUBLIC GUIDANCE FOR WAYS AND MEANS TO ASSIST CLIMATE CHANGE.

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

from the Commission

Ideas to consider including in your response

- **I welcome this draft roadmap** from the Commission. To all involved - thank you.
- **I support more ambitious action** to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- **I support a just transition.** Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- **Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.**
- I realise that everyone is going to have to make changes to achieve the outcomes we need. **I am willing to play my part** and I support bold action.

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz
