

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

I definitely agree with all of the points above - we are seriously running out of time and I can't tell you how stressful and terrifying it is for our generations to be stepping into.

PLEASE help us do more. This is beyond words.

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

Pope Francis wrote: 'Now, faced as we are with global environmental deterioration, I wish to address every person living on this planet.' Laudato Si' p.10.

: 'God has joined us so closely to the world around us that we can feel the desertification of the soil almost as a physical ailment and the extinction of a species as a painful disfigurement' Laudato Si' p.76

: None (no creature) is superfluous. Laudato Si' p.71

: In talking with his disciples, Jesus would invite them to recognise the paternal relationship God has with all his creatures. With moving tenderness he would remind them that each one is important in God's eyes. Laudato Si': On care for our common home. pp 81-82

May the words above serve to exhort all those concerned.

Tēnā koutou!

As a young New Zealander, I really welcome this report as part of a vital ongoing journey towards a sustainable future. What is needed is ambitious, immediate action - ~~being~~ a country with a much higher level of emissions per capita than many others, we really need to be implementing policies that will reduce emissions. This is the most important goal - please please make sure that the steps and commitments laid out are in line with ~~ensure~~ the path to keeping warming within 1.5 degrees.

Climate change is deeply linked to other issues of inequity, injustice and oppression. I fully support and encourage a just transition - those who are most able to pay for changes needed should do so, and those who are most vulnerable need to be completely supported. As we transition to a low carbon economy, communities, individuals and businesses really need to be proactively looked after - as we look after our planet.

Overall - I support more ambitious action in New Zealand. We need it and we owe bolder action now to future generations and to other countries, especially in the wider Pacific, who are already bearing the brunt of the consequences of climate change. I know that we'll all need to make changes in how we live to combat climate change - I'm more than happy to play my part and I expect commitment & vision on a governmental level.

To all involved in this process - thank you for your work.

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Kia ora, my name is _____

In 15 years from now, I will be 17 years old.

I am concerned about the future of our world, our common home in which we share life with all things. I know we can do more for our global neighbours and future generations by taking ambitious action at home in Aotearoa.

I hope in 15 years time, Aotearoa NZ will look like (draw a picture below):

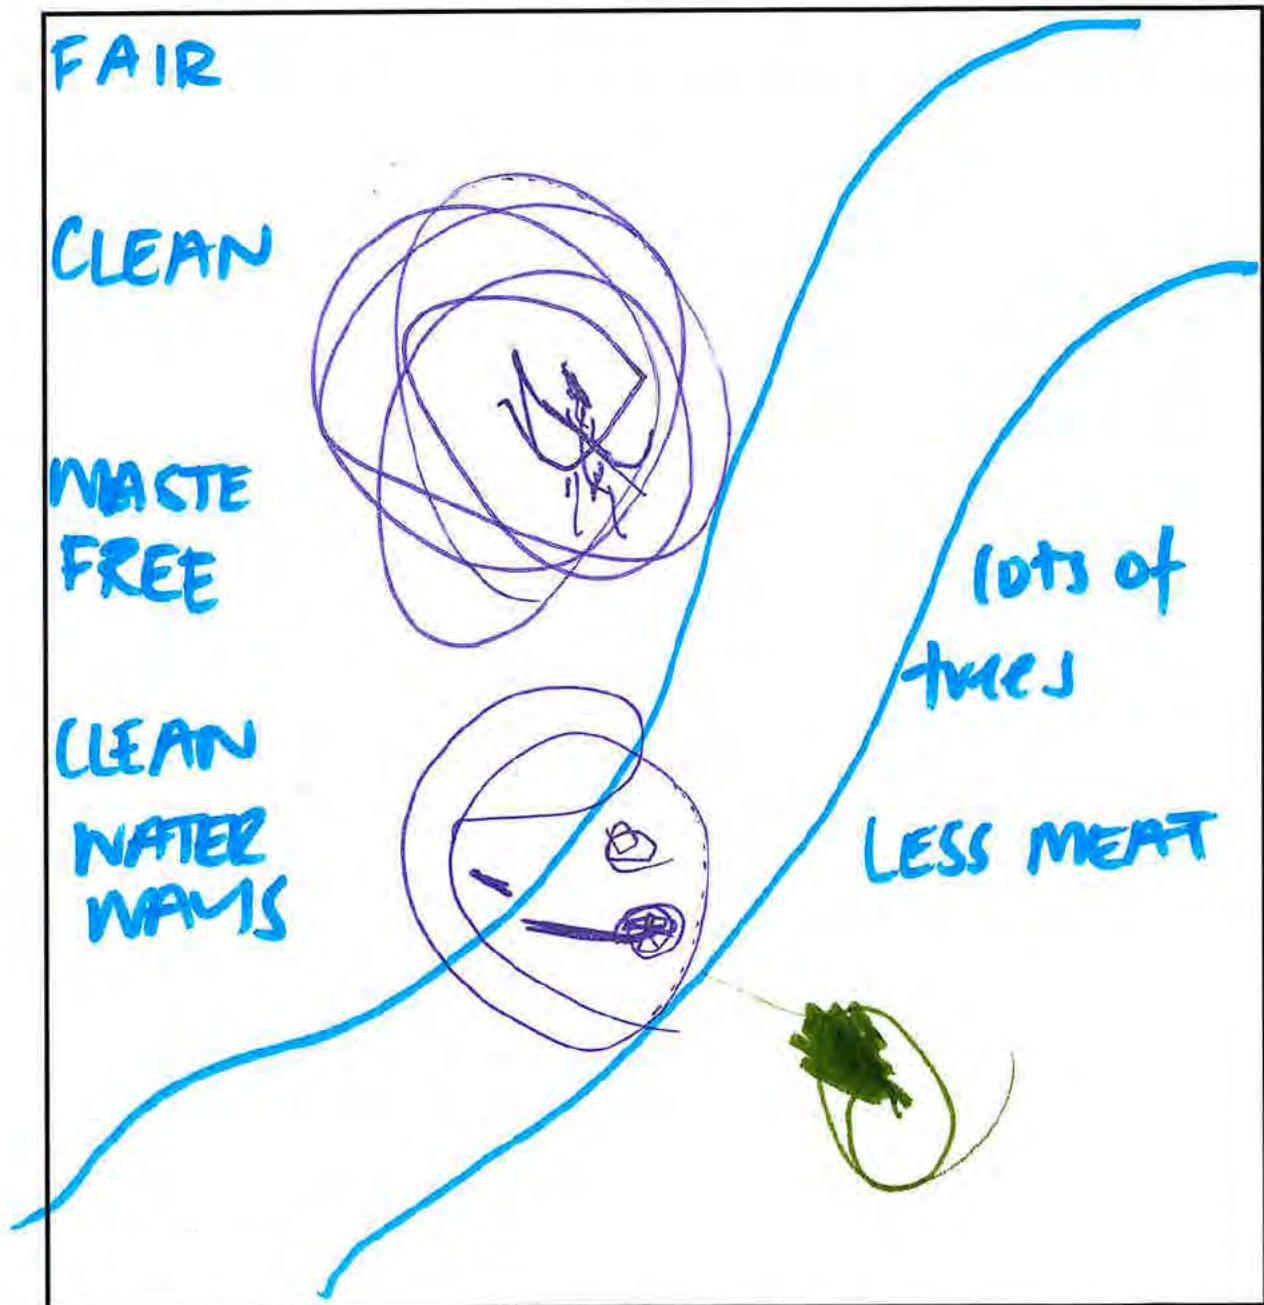

Please consider kids like me and our future when you finalise your report!

Kia ora, my name is [REDACTED]

In 15 years from now, I will be 19 years old.

I am concerned about the future of our world, our common home in which we share life with all things. I know we can do more for our global neighbours and future generations by taking ambitious action at home in Aotearoa.

I hope in 15 years time, Aotearoa NZ will look like (draw a picture below):

Please consider kids like me and our future when you finalise your report!

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

This road map is the first step towards actual change, but until it is enacted into policy it is just words - like the declared 'climate emergency'

NZ has a leadership role in the Pacific & we are blessed with the wealth & capacity to take bold steps to reducing our impact, rather than coasting on our Green image.

I'm willing to do my part, but change is systemic, and needs us to take into account the pain of change & doesn't just leave it to the poorest to foot the bill.

Bold leadership means not just sticking to popular policies but to act according to principle.

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

• It would be great to see actions in place to match the Zero Carbon Act

• I would love to see these steps done in a way that acknowledges the vulnerable eg how do people in poverty buy new vehicles that don't use petrol?

• I want to see actions put in place to keep warming within 1.5 degrees so the world we gift our mokupuna is on a path to healing

Ideas to consider including in your response

- **I welcome this draft roadmap** from the Commission. To all involved - thank you.

I wholeheartedly support the recommendations of the Climate Change Commission. NZ requires bold political leadership in this area to ensure Justice is upheld.

Please ensure that NZ keeps its promises to act now. Delay is unjust.

I am willing to do my part, and I call on the government to do theirs.

~~I support Bold Action~~
Thankyou to all who have drafted this roadmap
I welcome it and believe its the best way
forward at this time. We need to do more
and sooner. I have a 2 year old now and
I care even more than before the earth
she and future generations inherit. Delaying
actions harm her future. This action must
be just. - Looking out for those most affected
and those who can most afford to pay for
the transition should bear ~~the~~ most of the
expense.
Please ensure that all New Zealanders are
considered and that all of New Zealand's
commitments are consistent with doing our bit
to keep warming within 1.5 degrees.
Everyone will need to make changes to achieve
change. Im willing to pay my part.

These are some of the saying about
New Zealand I grew up with.

"She'll be right" - It won't at this rate.

"Clean and green" - it's not.

"We can fix ~~any~~ anything with our

"Can-do Attitude and number eight
fencing wire." - Where this attitude
when to climate change.

"Have a go." - Why not a
have a go at making New Zealand
a better place for our children.

Ideas to consider including in your response

 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

To those in power: Please don't delay action! We are looking to you to be courageous and decisive. We want opportunities as consumers to make better choices. Changing things at higher levels enable us on the bottom to do our part.

Those with more capacity of money need to make a way for those with less. Let's support rather than penalise. NZers are ready & willing to do our part: Please lead the way!

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.

I support the recommendations from the commission and more. We can do more than this, while at the same time creating a more equitable society. I am willing to live with less, but it's too difficult to make the right choice every day when all of society makes it cheaper and easier to make the wrong, harmful choice.
He waka eke noa.

- unrealistic ideas
- farming is vital for NZ economy.
- The issue is not farmers, cities produce far more harmful waste.
- Farmers do their bit, they care about the land and sustainability more than anyone.

to reduce Sheep and beef numbers by 15%. We need to develop our economy to be sustainable w/ these major exports. Less plastic in supermarkets, encourage a market-style way of buying food and produce. Higher fees for landfill rubbish dumping and more available recycling
