

Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including up to 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to kate@anglicanmovement.nz before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. To make a more detailed response, visit: haveyoursay.climatecommission.govt.nz

I have drunk Motalava bore water in Vanuatu and washed dishes (3 meals) all day in the same dish because it's so scarce (after rinsing in the sea sometimes)

I lived in Tanzania as a child and knew many who carry water further a further or suffer floods more frequently.

Please let's do this for the rest of the world if not for ourselves

& roll out seaweed feed for cattle!
such practical adaptations

Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
 - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

Thanks for setting up the Commission. I agree the issues are important, the proposals valuable and the time frame reasonable. With some help such as subsidies to assist change we should be able to achieve the target. I hope to play my part

We need to take action now but it must be just and fair. Those that can afford to make changes should be encouraged to do so, those that can't afford to will be supported in the change that need to be made.

Also encourage switch to electrification target those things that are easiest to change.

Ngā mihi nui ki Aotearoa. Thank you for your mahi. This is an important kaupapa and the recommendations you have drafted are promising. All efforts to support our Pasifika brothers & sisters are so, so needed and we have an obligation as a good neighbour to do our part & go further to help our Pasifika whānau in their time of need. Please prioritise indigenous perspectives and ways of doing things in your advice and centre Te Tiriti o Waitangi. Consider the effects of climate injustice on our most vulnerable and advise in a way that leads to a just and equitable transition. Resound climate action. Hear the voices of our disabled whānau from organisations like SustainAbility. This is important mahi you are doing and we encourage you from the bottom of our hearts. We will be praying for you as you develop the advice and as it is adopted. Ngā mihi!
