## Have your say on the Climate Commission's Draft Advice

This year the New Zealand government will set emissions-reduction goals for the next 15 years and begin work towards these goals.

On 1 February, the Climate Change Commission issued draft advice to the government on what goals they should set and what policy changes they should prioritise. They recommend reducing net emissions by 36% over the next 15 years, with a range of measures including:

- Banning the import of internal-combustion engine light vehicles by 2035
- Increasing the proportion of travel by walking (25%), cycling (90%) and public transport (120%)
- Achieving 99% renewable energy
- No new installations of gas and coal heating
- Diverting organics from landfill
- Reducing sheep and cow numbers by 15%
- A huge tree planting programme, including up to 25,000 hectares of native forests annually.

The Commission is seeking public feedback on its advice.

### Anglicans across our region will make our voices heard.

Following the huge success of Anglican Movement in previous campaigns calling for bold and necessary action, we are collectively making our voice heard again.

Post this form to Kate Day at the Anglican Centre, 18 Eccleston Hill, Wellington OR email a photo of it to [kate@anglicanmovement.nz](mailto:kate@anglicanmovement.nz) before 22 March 2021. We will pass on all responses we receive to the Climate Change Commission. #### Ideas to consider including in your response

- I welcome this draft roadmap from the Commission. To all involved - thank you.
- I support more ambitious action to be fair to other countries and future generations.
  - New Zealand needs to do more, sooner. We are a highly developed nation and can afford the changes required. We have contributed more emissions per capita than many other countries, so our response should be commensurate. Delaying action shifts the burden to future generations and that is not fair. Further, we should not achieve our goals by paying other countries to plant trees for us. We need to reduce emissions here instead.
- I support a just transition. Those who can most afford to pay for the transition should bear most of the expense. Those that are most vulnerable in this transition need to be supported. As a society we need to look out for individuals, communities and businesses that are most affected and support them in the transition to a low carbon economy.
- Please ensure that all New Zealand's commitments are consistent with doing our bit to keep warming within 1.5 degrees.
- I realise that everyone is going to have to make changes to achieve the outcomes we need. I am willing to play my part and I support bold action.

Please work more and harder to make sure NZ Aotearoa's contribution to lowering global warming is significant in keeping rises under 1.5°

I intend to reduce car trips, walk more, consume less, and grow more plants.

Please protect people on low incomes from adverse effects of the changes we make to protect our planet.

Our children and grandchildren need us to make big changes soon.

I am pleased that the Commission has completed its draft roadmap. Thank you to all involved for the work done thus far.

I support more ambitious action - more to be done sooner, so that our generation pays more of the cost rather than future generations. Targets set toward 2030 would be better.

I would also like to see that those who can afford to pay for the transition should bear most of the expense, while those who are most vulnerable in the transition need to be practically supported in the transition to a low-carbon economy.

Please make sure that NZ's <sup>commitments are</sup> consistent with doing our bit to keep warming within 1.5°.

It will involve all of us taking a bit & I am prepared to play my part.

I am supportive of bold action - beyond even the Commission's recommendations.
